Dear Freddy Pattiselanno,

I am writing to invite you to review a manuscript for Advances in Animal and Veterinary Sciences entitled "The Body Condition Score of Pigs Infected with Gastrointestinal Parasites in Dogiyai District, Papua Province, Indonesia" with manuscript ID MH20210216030258.

Please let me know as soon as possible if you will be able to accept this invitation by clicking on the appropriate link below. We request reviewers to return their reviews preferably in track changes functionality of the Microsoft Word within 15 days of agreeing to review.

[Yes, I will review the manuscript \(click\)](#)

[No, I cannot review the manuscript this time. \(click\)](#)

To review this manuscript, please use the log-in information below:

URL : <http://manuscripthandler.com/nexus/Advances-in-Animal-and-Veterinary-Sciences>

Username : pattiselannofreddy@yahoo.com

Password : 2y4lqvm1

To submit your review report, please click "Yes, I will review the manuscript (click)" and you will be directed to online portal, Manuscript Handler.

We ask reviewers to help ensure studies are scientifically credible and were conducted ethically and in accordance with appropriate reporting guidelines. We do not require a judgement on priority or breadth of appeal.

We have placed Abstract at the end of this email to give you an estimation of contents of the manuscript. We really appreciate this support, which is required to assure speedy processing of the manuscript.

If you are unable to review at this time, I would greatly appreciate your recommendations for other expert reviewers. You may click on "No, I cannot review the manuscript this time. (click)" to provide appropriate recommendations in our online manuscript submission and review system, Manuscript Handler.

Sincerely,

Editorial Office

Abstract :

This study was aimed at the effect of gastrointestinal worm infection on the BCS of pigs in Dogiyai Regency Papua Province, Indonesia. Interviews and direct observations were conducted on farmers in Dogiyai Regency. Fresh fecal samples of pigs were collected and examined by using native and quantitative methods. BCS were carried out by observing the appearance of adult pigs. Data was analyzed by using descriptive method and displayed in the tabulation format. Result: most respondents had a degree of formal education and show quite high farming experience. The farming system was carried out traditionally. Based on morphology, the types of worm eggs identified were the strongly type (36.12%), *Strongyloides ransomi* (26.48%), *Oesophagostomum* spp (20.44%), and *Trichuris suis* (16.96%). A total of 91.11% of pigs had multiple infections with the degree of infection based on EPG being mild as much as 11.11%, moderate as much as 72.22%, and heavy as much as 16.67%. Pigs with a mild degree of infection had a BCS from a score of 2 to 5, moderate degrees had a BCS from a score of 1 to 5, and those with a severe degree of infection had a BCS with a score of 3 and 4. In this study, gastrointestinal worm infection did not affect the BCS value of pigs.

Dear Dr. Freddy Pattiselanno,

Thank you very much reviewing the manuscript. We really appreciate your time and assessment, which will help us to maintain quality of our contents.

Detail of the manuscript:

Manuscript ID: MH20210216030258-R1

Manuscript Title: The Body Condition Score of Pigs Infected with Gastrointestinal Parasites in Dogiyai District, Papua Province, Indonesia

Journal: Advances in Animal and Veterinary Sciences

You can always login to your Reviewer's Panel to access the submitted report.

Thanks once again for your time and we look forward you considering our requests in future.

Best wishes,
