to me, Sustainability, Dylan

Dear Dr. Pattiselanno,

We have received the following paper, submitted to Sustainability (<https://www.mdpi.com/journal/sustainability/>).

Type of manuscript: Review

Title: LOCAL BIODIVERSITY: IMPORTANCE, DIVERSITY AND IMPACT. A REVIEW

We kindly invite you to review this paper and evaluate its suitability for publication in Sustainability. The article abstract is available at the end of this message.

If you choose to accept this invitation, we would appreciate receiving your comments within 10 days. Please let us know if you are likely to need more time to complete your review.

Please click on the link below to let us know if you will be able to provide a review and access the full manuscript and review report form.

<https://susy.mdpi.com/user/review/review/34372617/d1wXsMiU>

In recognition of the contribution of reviewers, for thorough and timely review reports we provide discount vouchers for Article Processing Charges (APCs) applicable for manuscripts accepted for publication after peer review in any MDPI journal. Advice for completing your review can be found at: <https://www.mdpi.com/reviewers>.

Please disclose any potential conflicts of interest you might have concerning the manuscript's contents or the authors.

If you are not able to review this manuscript, we kindly ask you to decline by clicking on the above link such that we can continue processing this submission. We would also appreciate any feedback you can provide at this time (i.e., your general impression regarding the quality of this manuscript) and any suggestions for alternative expert reviewers.

Sustainability is an open access journal of MDPI. Thank you very much for your consideration and we look forward to hearing from you.

Kind regards,  
Mr. Dylan Xie

Title: LOCAL BIODIVERSITY: IMPORTANCE, DIVERSITY AND IMPACT. A REVIEW

Authors: Daniela Ilie, Sina Cosmulescu \*

Abstract: To promote sustainability, knowledge and conservation of biodiversity in urban green spaces requires clarification of the diversity of spontaneous species in green spaces and assessment of the impact of local biodiversity in these spaces. The following is a review of these questions and the answers provided in the literature. Based on the research carried out, it is considered that green spaces contain unique and useful biodiversity resulting from their management. Spontaneous flora can be a source of plants with decorative qualities, which can be cultivated in an ecologically sound way in individual gardens and green spaces in urban and rural areas, with some special agro-biological characteristics (ecological plasticity, high hardiness, etc.). The biodiversity of outdoor improvement is a key feature of the urban landscape, offering numerous benefits, and the conservation of this biodiversity in urban green spaces is fundamental and requires an integrated approach. However, urbanisation usually has a detrimental influence on local species' diversity. Spontaneous plants and spontaneous plant ecosystems can be considered ecological assets when considering their tolerance of urban environments, their potential to be highly diverse and to support a unique wildlife, and their contribution to providing regulating ecosystem functions and services

Keywords: biodiversity; green spaces; sustainability

Note: We discourage reviewers from recommending citation of their own work when not clearly necessary to improve the quality of the manuscript under review. Please state in your comments to the editor if you recommend citation of your own work and the reason for this recommendation.

MDPI partners with Publons (<https://publons.com/in/mdpi/>) to provide recognition for reviewers. Your credit will appear on Publons after a final decision on the paper and once you have claimed your review on the Publons website.

Disclaimer: This peer review request and the contents of the manuscript are highly confidential. You must not distribute the manuscript, wholly or in part, to a third party.

to Dylan, Sustainability

Dear Editor,

Thank you for giving me the opportunity to be involved in the review process of the submitted article.

Would you please give me 14 days (2 weeks) to complete the review process? We are now in the rush hour to finish all the responsibility for the final report in the university. So I would like to ask your favor to extend me four more days to do the review work.

While waiting for your response upon this matter, I would like to thank you in advance.

Sincere regards, Freddy

# REVIEW CONFIRMATION CERTIFICATE

We are pleased to confirm that

*Freddy Pattiselanno*

has reviewed 3 papers for the following MDPI journals in the period 2022–2023:

*Conservation, Hydrobiology*

---

*Shu-Kun Lin*

Dr. Shu-Kun Lin, Publisher and President  
Basel, 28 February 2023

MDPI is a publisher of open access, international, academic journals. We rely on active researchers, highly qualified in their field to provide review reports and support the editorial process. The criteria for selection of reviewers include: holding a doctoral degree or having an equivalent amount of research experience; a national or international reputation in the relevant field; and having made a significant contribution to the field, evidenced by peer-reviewed publications.
